Cross Hub and Square Hub
4-port USB2.0 hubs

Do you find all of your USB ports regularly filled with USB sticks, a printer, card-reader, cameras and other devices? The two USB2.0 hubs from SHARKOON have 4 USB ports (type A) and offer a solution for those overwhelmed with too many devices.
The hubs connect quickly and easily to every USB capable computer and can be used immediately following the connection.
Both models work with an extra power adapter so that high powered devices can also be connected (adapter not included!).
The cross-shaped arrangement of the USB ports on the Cross Hub assures that there is enough room for each device, while with its compact size the Square Hub fits easily on any part of the desk.
The Square Hub is available in black or white, and we offer the Cross Hub in pink or black.

Features Cross Hub:
- 4-port USB2.0 hub
- Crosswise USB port alignment, robust body
- Connector for additional power supply
- Supported operating systems: Windows XP, Vista, Mac OS9.2 and higher
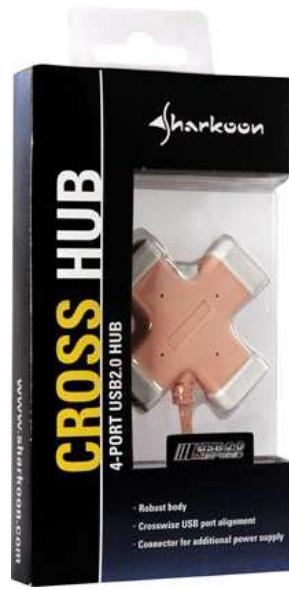

Features Square Hub:
- 4-port USB2.0 hub
- Compact design, robust body
- Connector for additional power supply
- Supported operating systems: Windows XP, Vista, Mac OS9.2 and higher
